

Fink Machine
Revolutionary Wood Heating Technology

Advanced Wood Combustion Training Course June 12 & 13 Enderby, BC

Join Fink Machine June 12 and 13th for a 2 day advanced wood heating course.

Day 1— Overview of Advanced Wood Heating

Featuring an overview of advanced wood heating systems, their components, fuel selection, case studies, boiler emissions and Q&A. It will also include a tour of Fink Machine’s district energy system as well as an installation at a furniture manufacturer and Enderby Public Works. This session is designed for decision makers, influencers and non-technical project developers

Day 2—Advanced Technical Training

Featuring a detailed review of system components including the safety systems, system design considerations, fuel selection and standards, detailed case studies, boiler controls and integration, system operation and maintenance and boiler emissions as well as a detailed Q&A . It will also include a tour of the Fink Machine district energy system and Enderby Public Works. This session is geared towards engineers, consultants, operators and installers who require a higher level of information.
