

Rent-to-Own Program For Commercial Heating Systems

New

Rent-to-own and start saving money today

Program benefits at a glance

- Accountant friendly rent-to-own agreements for energy retrofits/renovations
- No money down. Typically 100% of the project cost can be financed
- Flexible terms options including monthly, quarterly, semiannual and seasonal
- Potential tax advantages. Claim rental payments as expenses rather than depreciating them as a capital cost
- Minimal buyout cost (\$10) and early payout benefits

Rent-to-own: Simplify funding for new installations and retrofits

Whether your facility management portfolio includes non-profit housing, municipal buildings, apartment buildings, schools or commercial properties, there are few better ways to preserve capital than to acquire energy-efficient heating system equipment through the Viessmann Rent-to-Own Program. With favorable funding and flexible term options, you can acquire Viessmann equipment and related system components, along with installation costs and other project expenses.

Modernize to improve energy utilization

A high-efficiency heating system retrofit can reduce fuel consumption by up to 30% compared to an older, outdated system. By lowering operating costs, your investment can pay for itself within a few years.

Gain independence from wide fuel price fluctuations with renewable energy

Harness clean, abundant solar energy by integrating a solar thermal system, or choose biomass wood heating – a modern, eco-friendly and economical alternative (or addition) to conventional fossil fuel systems – as your primary heating source.
